

# Space Adventures

Jack and Jill were space travelers. They roamed the stars looking for adventure. One day, Jack and Jill discovered a new planet. Just what they were looking for! They parked their spaceship between two giant rocks. They got out and started to look around. The new planet was dry, without any plants or trees. It didn't look like anyone lived there. Jack found a lake. He dipped his toe in, hoping something might swim over. Nothing happened. Jill jumped in and splashed around. Nothing happened. They started back toward their spaceship. If there was no life on the planet, they would keep looking somewhere else.

While they were walking, they felt the ground begin to shake. Jack and Jill ran all the way back to their spaceship. They did not know what was happening and were both frightened. The ground shook harder, and they heard a rumbling noise. It sounded like someone was snoring! They got into their spaceship and started to fly away. When Jack and Jill looked back, they were amazed. The ground was moving, and a giant mouth opened in a huge yawn. Two eyes stared at them.

They had not found a planet. They had discovered a space monster!
